The Stinger Attachments RG Series Rock Grapple is the proven RK Series Rock Bucket fitted with dual grapples to secure debris. This bucket features a contoured tine that helps keep material in place to sift or add more product to the load. This grapple is built with the strongest backbone in the industry, featuring a 1-piece tine design that is welded around a 3" x 3" lower backbone. This design adds considerable strength and life over the more common 2-piece welded tine utilized in most other brands.

PROPER BLAST REQUIRED
